PPH, Stripped.pdf

Same file size issue on your server too (max 10MB file). Will send this one and one more to follow.

My earlier attempt at sending all 3 files was thwarted by your server. Am going to send these piecemeal in 2 emails.

This may be academic now, but word got out that Freedom Industries had another compound mixed in the tank which leaked the Crude MCHM in Charleston.

Subject: Additional chemical was in Tank 396 with the MCHM that was leaked

Good morning,

During the 10am meeting with Freedom Industries this morning we were told that there was a mixture in Tank 396, instead of just MCHM. The mixture was approximately 5.6% of the PPH which can be found in the attached MSDS sheet from published by Freedom Industries. The PPH is a combination of the two products from DOW which are also attached to this email. Approximately 300 gallons of the PPH with 6251 gallons of MCHM for the total release (including what is still in the soil and what made it to the river).

Thanks,

Melissa Linden

Subject: MSDS for PPH

Hello,

Attached, please find the three MSDS for the PPH.

Thanks,
